## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-23, drawn to a dried food product and a method of making the dried food product, classified in class 426, subclass 640.
- II. Claims 24-29, drawn to an apparatus for producing a dried food product, classified in class 99, subclass 483.

Inventions I and II are related as product and its method of making and apparatus. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand and product as claimed can be made by another and materially different apparatus, or (2) the apparatus as claimed can be used to practice another and materially different process and can be used for making a different product. (MPEP § 806.05(e)). In this case the process and product do not require the apparatus. The food product can be frozen in a standard freezer and thawed and predried by dipping the frozen food product into a solution by hand.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Todd Oberdick on October 13, 2004, to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).
